

## Senior Survey Engineer (Offshore position)

MMT Sweden is a high end survey company delivering high speed multi sensor solutions to our clients in the oil and gas, renewable and cable industries. As we are expanding our fleet of vessels and ROV's we are looking for motivated and skilled specialists to strengthen our teams onboard.

### Job description

Primary functions of this position are to ensure all equipment is prepared and tested. Integration of survey sensors on the ROV's. Fault finding and maintenance of survey sensors, FO multiplexers and computer hardware. Liaison with onshore technical support and manufacturers. Maintain documentation and inventory of spare parts onboard survey vessels.

### Key Requirements

High attention to detail and documentation while under pressure.  
Ability to take initiative and work unsupervised.  
Experience with either ROV, ROTV and/or AUV operations.  
Relevant experience from offshore operations.

Extensive knowledge in the fields of:

- Fiber optics
- Electronics
- Switched networks
- Survey sensors

If this sounds exciting please send your CV and a covering letter to: [anna.lundkvist@mmt.se](mailto:anna.lundkvist@mmt.se) with subject 'Senior Survey Engineer'.
