

Senior/Data Processor (onshore/offshore)

Are you fed up with just being a body in a chair?
Then why not come and join MMT!

MMT is a highly respected international survey company with offices in Sweden and the UK. Due to an expansion of our world class fleet of vessels, ROV's and SROV's, we are looking for motivated and skilled specialists to strengthen our teams across all areas. We are searching for a Senior/Data Processor that will work primarily but not exclusively offshore on our vessels, in two or four week rotations.

We have interesting and varied work in a number of sectors such as oil and gas, renewable, cable and hydrographic industries along with supporting our own in house R&D projects and high profile jobs such as the Black Sea Mapping project as featured in the National Geographic. Knowledge of NaviModel and Caris advantageous but not essential. Training available for the right candidate.

If this sounds interesting, please send your CV and cover letter
to: anna.lundkvist@mmt.se
